

## Accredited by the Australian Soc of Ultrasound Medicine

### Features:

- One of the longest running pleural courses in Australia
- Small groups with hands-on experience led by world leading pleural experts
- Many hours of practice on animal and simulation models
- Ultrasound learning with patients
- Lectures on state-of-the-art pleural care by authors of landmark pleural papers and international guidelines
- Take home materials including, *Pleural Ultrasound for Clinicians* e-book: the most comprehensive text on pleural ultrasound

### FEEDBACK from past participants:

*'most in depth pleural course in Australia'*

*'lots of hand on opportunities and direct discussion with tutors'*

*'far more time and cost effective than traveling to interstate courses'*

**Pleural disease is common. This course is suitable for clinicians of all grades who look after patients with pleural diseases. Training and procedural competency are essential to provide best care.**

## WORKSHOP CONTENT

### Day One

- In depth lectures on thoracic ultrasound, the basics and beyond
- Small group teaching from thoracic ultrasound experts
- Hands-on experience of normal thoracic ultrasound and identification of pleural pathologies

### Day Two

- In depth lectures on pleural procedures
- Simulation and animal tissue models for thoracentesis/chest tube placement
- Demonstration/experience of indwelling pleural catheter placement and aftercare
- Recognition and management of complications of pleural procedures
- Experience of new drainage systems
